
Practical help for businesses

Bioenergy and Energy Systems

Expand your business horizons

Are you interested in:

Creating new value from waste products by turning them into energy?

Producing new high value materials from waste, which can be commercialised?

Generating new value from better management of energy use and generation, using advanced control systems to optimise heating, cooling and electricity?

Developing new opportunities in emerging and disruptive marketplaces, such as the 'internet of energy'?

Is your business seeking:

New opportunities in the bioeconomy marketplace including biomass, biorefining, bioenergy, biofuels and biobased products?

Expert advice and guidance to help you develop the bioenergy and energy systems solutions that are right for your organisation?

Help is at hand

EBRI's world-leading team of bioenergy and energy systems scientists and business experts offer a range of solutions that can support your business to exploit such opportunities. See overleaf for more details.

The European Bioenergy Research Institute (EBRI) at Aston University provides practical solutions for businesses to explore the growing bioenergy and energy systems markets, and the opportunities they offer.

Supporting companies with energy technology

EBRI is running an innovative programme to help SMEs in the West Midlands* stimulate business start-up and growth, as well as the development of new products. This initiative can give your business the opportunity to access a wide range of specialist support, cutting-edge technologies and bespoke events, such as workshops and seminars.

How you can benefit

EBRI offers your business the following opportunities:

- **Technology Business Support**
Gain access to EBRI's pyrolysis and gasification test facilities, as well as help with feedstock analysis. In addition to this, company reports on viability and technology requirements can take place at your premises and/or at EBRI's laboratories.
- **Economic Feasibility Studies**
EBRI can provide you with an assessment of the nature of the proposed technology, and economic assessments of risk and return.
- **Events**
EBRI will be holding a series of tailor-made workshops and seminars specifically for business decision makers and entrepreneurs to build awareness of bioenergy, energy systems, and their applications.

Get in touch

If you are interested in benefiting from the opportunities that EBRI can provide to your business:
